

## Are You a Health and Safety Professional?

Are you willing to contribute to the HSW (retail, supply chain, manufacturing, and transport) community?

ShopCare is looking for Health and Safety professionals, who have experience in injury management, and want to contribute to an initiative that will make a real difference across industry, providing practical tools to reduce harm.

### Early Notification of and Intervention to Reduce Discomfort:

We are about to start work on an initiative to develop comprehensive, yet generic resources around the early notification and intervention for discomfort. This is where a worker has not had a specific injury but feels discomfort relating to work and reports it early. The employer then intervenes and provides support to the worker to mitigate possible damage, and try to prevent it becoming an injury, which protects the worker and reduces potential lost time.

### Injury management process:

This would apply where an injury has occurred and will identify the steps an employer and the worker can take to support and rehabilitate the injured worker as soon as possible.
